

Morrisville
Live connected. Live well.

Environment & Stormwater Committee
Acceptable Recyclables

- Newspaper*
- White Paper*
- Green, brown and clear glass
- Corrugated cardboard
(over 3' by 3' must be cut down and flattened)
- Paperboard, such as cereal boxes and shoe boxes
- Magazines
- Junk mail and catalogs
- Phonebooks

*Please keep paper dry, as wet paper will be sent to the landfill.

- Plastic bottles / containers
(#1 - #7, with neck smaller than body)
- Juice bottles
- Sports drink bottles
- Salad dressing bottles
- Condiment bottles
- Laundry detergent bottles
- Dishwashing detergent bottles
- Cough syrup bottles
- Mouthwash bottles
- Shampoo / Conditioner bottles
- Liquid soap bottles
- Aseptic juice boxes – vacuum sealed
- Paper cartons, such as milk or juice cartons
- Milk jugs
- Metal food cans
- Aluminum beverage cans
- Aluminum foil (with no food residue)
- Six-pack rings
- Yogurt cups
- Clean pizza boxes
- Frozen Food Trays (with #1-#7 on the bottom)

Rinse and flatten all recyclables as appropriate to maximize the use of your recycling bin or cart space.

HERE'S WHAT SHOULD STAY OUT OF THE RECYCLING BIN:

Environment & Stormwater Committee

Purpose

The Town of Morrisville's Environment & Stormwater Committee (**MESC**) is committed to community education about recycling and solid waste. We are also in place for making sure the Town Council has all of the information they need to make sound decisions on solid waste and recycling collection for the Town.

Mission Statement

The Morrisville Environment and Stormwater Advisory Committee is dedicated to enhancing the quality of life in our community by raising awareness of environmental issues and encouraging positive action.

Want to save the Environment along with a little of your hard earned money? Try these conservation ideas:

- Motion sensor/timed interior & exterior lights
- LED light bulbs inside & out
- Replace old caulking/seals around windows & doors
- Replace appliances with energy efficient options
- Seal leaky faucets, hoses, or toilets
- Do not idle vehicles at bus stops/pick up lines
- Programmable thermostats
- Set thermostats as low as possible in winter & as high as possible in summer (1 degree = 1% on bill)
- Insulate & seal attic access
- Hot water temp at faucet should be approx. 120 degrees
- Install low flow faucets & shower heads
- Use rain barrels to assist with watering
- Watering Days:
Even addresses: Wed, Fri, Sun
Odd addresses: Tues, Thurs, Sat
- Composting – reduces water usage by not using disposal and alleviates the burden placed on wastewater treatment
