Parkside Elementary School - PROJECT UPDATE

This publication is intended to keep our partners and neighbors informed on current news and happenings on the Parkside Elementary School project site.

Happy Labor Day!

Construction activity will continue to increase on site as we continue concrete foundation footings and pouring concrete slabs on grade. Our masonry contractor has been installing the block walls for the building. Our steel contractor is on site with their crane and has started erecting the structural steel components for the building. In the coming months, the following activities on site will include:

- Construction of masonry building walls will continue
- Structural steel to continue including long “barrel” roof framing
- 2nd floor slabs will be poured and roofing work will begin
- Curb, gutter and asphalt will be placed in parking lot and Little Drive entrance road

As a reminder, please remember to follow these guidelines to ensure your continued safety:

- **Please observe all posted directional and safety site signage.**
- **Never venture into the job site unescorted, especially on weekends.**
- **Never venture on to the site while work is ongoing.**

If there are any specific questions regarding the jobsite and / or project, or to schedule a site visit, please contact **Dan Ahles via email at dahles@gilbaneco.com**

Ongoing and Upcoming Activities:

- **Concrete Slab Pours**

- **Masonry & Steel Construction**

- **All trucking and construction deliveries to site will continue to use Little Drive exclusively**
- **Sitework and grading to commence at play field areas (south side of site, adjacent to Parkside Valley Drive)**
- **Roadway, entrance and utility work at Parkside Valley Drive (more details to follow in separate newsletter)**

Project Team:

On Site:
Dan Ahles – Project Manager
Stephanie Rubin – Project Engineer
Paul Groff – Project Superintendent
